Z1300

JB-POWER COMPLETE MACHINE

KAWASAKI Z1300

In 1979, after five years' development, Kawasaki spectacularly unveiled their new flagship model, the Z1300, designed to replace and exceed the Z1. With its water-cooled, 120ps, straight-six-cylinder engine and the weight exceeding 300kg it was truly a shaft driven monster. Huge like a warship it failed to cope with the change of times and ended short-lived, yet this miscreant monster has a special ride quality. Although over thirty years have passed since release, its unique character has not faded and continues to mesmerize many fans. Answering numerous requests of its core fans, after one year of research BITO R&D developed special super lightweight JB-POWER MAGTAN JB4 wheels which make the installation of the latest radial tires possible. Despite the front wheel being 3.2kg and the rear 2.6kg lighter than genuine, MAGTAN still maintains rigidity and durability. By accomplishing a total weight reduction of staggering 5.8kg, the handling changed dramatically. Its silky and torquey straight-six-cylinder engine revs hassle-free over the entire rpm range, accompanied by the refined sound of the beautiful hand bend titanium exhaust system. With the JB-POWER Z1300 a dream motorcycle, promising a supreme riding experience you will want to continue forever, has been created.

EXHAUST JB-POWER HIGH PERFORMANCE PARTS
